## **Abstract**

### ***RESEARCH METHODOLOGY IN SOCIAL SCIENCE***

***Dr. Nisha Rani Dhanwar***

***Assistant Professor***

***Department of Political Science***

***St. Xavier's College, Simdega***

***Ranchi University, Ranchi***

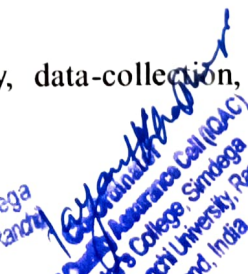

Social Science Research is a systematic and scientific process that studies social phenomena, behaviours and structure. Researchers in social science use special research methods to study social issues, problems, behaviour and relationships by developing in-depth knowledge and understanding. In the present era, with the change, the values and beliefs of society are also changing. Research methodology in social science is a systematic approach to research, which includes many methods; research problem, research design, hypothesis, data collection methods, analysis of data and writing reports. It includes the use of qualitative and quantitative and mixed method research approaches. Techniques like observation, survey, interview, schedule, questionnaire etc. Statistical analysis, thematic analysis and content analysis are included to analyse the data, which gives scientific study to the research. The importance of research methodology in social research is systematic investigation, reliability of findings and generalization to wider groups. Research methodology in social research helps in influencing social policy decisions, evaluating the subject and building theory.

This abstract highlights the importance of research methodology in social science research which plays a vital role in ensuring the quality and validity of research findings. By using systematic and sequential research methods, social research can be presented with high quality which helps in the development of knowledge in society.

**Keywords:** Social Science, research methodology, data-collection, analysis, scientific, knowledge
